

SKF BLUE LINE BEARING UNITS HELP STOP WASHDOWN BECOMING A RELIABILITY RISK

WHY CHOOSE SKF BLUE LINE BEARING UNITS?

SKF Blue Line bearing units are purpose-built for food and beverage production environments where aggressive washdown, chemical exposure and hygiene compliance are part of daily operation. With food-grade materials, blue optical detectability and a sealed, relubrication-free design, they help reduce contamination risk and support production uptime.

ENGINEERED FOR WASHDOWN

Food-Grade Materials:

Designed for hygiene-critical food and beverage processing environments.

Blue Optical Detectability:

Supports visual identification if component damage occurs during production.

Robust Sealing:

Helps protect internal components from moisture and cleaning agent ingress.

BUILT FOR COMPLIANCE

NSF H1 Grease:

Supports safe operation where incidental food contact may occur.

Hygienic Design:

Helps reduce contamination risk in regulated production environments.

REDUCED MAINTENANCE

Relubrication-Free Design:

Removes the need for routine greasing and reduces manual maintenance touchpoints.

Reliable Operation:

Supports more predictable performance across frequent washdown cycles.

APPLICATIONS

Food and Beverage Processing:

Production lines, washdown zones, hygienic processing areas and high-moisture environments.

Cleaning-Intensive Operations:

CIP, SIP, pressure washdown and chemically exposed production areas.

MOTION AND SKF PARTNERING FOR SUCCESS

If your business wants to improve reliability and reduce costly disruption, Motion offers tailored solutions:

24/7 SUPPORT

Available support when critical production issues arise.

NATIONWIDE NETWORK

Local branches provide quick access to stock and expertise.

ON-SITE ENGINEERING

Expert support to keep operations running smoothly.

START STRONG IN WASHDOWN-CRITICAL PRODUCTION

Plan ahead to reduce downtime. Inspect and replace bearing units exposed to CIP, SIP and high-pressure washdowns with SKF Blue Line bearing units to support cleaner, more reliable operation.

Contact Motion today to learn how SKF Blue Line bearing units can help protect uptime in hygienic food and beverage environments.

WHY PARTNER WITH MOTION?

Motion offers more than products. Our key partnerships help you optimise your operations.

Our collaboration with SKF ensures you receive bearing solutions designed for your specific production challenges.
