

MOTION ONSITE HOSE SOLUTIONS

WHO WE ARE.

Motion delivers a world-class customer-first approach to everything we do. This has firmly established our business as the leader in the market, providing excellence and expertise in industrial products, solutions, and services.

For more than 100 years we have been a feature in the Australian industrial landscape giving customers unmatched products and service through an integrated network of branches, workshops, and service centres.

We have an ongoing commitment to invest in our people, facilities, IT, and systems to ensure we can continue to offer a broad ranging and premium level of engineering design, servicing, and turnkey projects to our customers across Australia.

We are committed and proud to keep our customers in motion, every day of the year.

“**WE KEEP
THE WORLD
MOVING**”

CONTENTS

Onsite Fluid Power Solutions — built for productivity

- 1800 HOSE VAN – Emergency onsite hose repair & troubleshooting
 - Krimpmatic Equipment – In-house hose assembly solutions
 - Mobile Workshop – Containerised onsite hose manufacturing facility
 - Motion Hose Hub – Compact modular in-house hose cell

1800 HOSE VAN POWERED BY MOTION

Fast. Reliable. Onsite.

Motion's 1800 HOSE VAN brings professional hydraulic hose support to your site so critical equipment returns to service quickly and safely, backed by Motion's national network and supply chain.

THE PROBLEM

Hydraulic hose failures stop equipment instantly, costing time, money, and productivity.

Offsite repairs and delayed service only extend downtime.

THE SOLUTION

Motion's 1800 HOSE VAN provides 24/7 diagnostics, hose manufacture and replacement at your location, reducing delays and eliminating the need to move machinery. Our trained specialists restore equipment quickly and keep operations running efficiently.

Features

- Fully equipped mobile hose manufacturing
- Extensive onboard hose & fittings range
- 24/7 emergency response
- Onsite diagnostics & assembly
- Backed by Motion's national network

Benefits

- Minimised equipment downtime and faster return to service
- Elimination of machinery transport costs for offsite repairs
- Improved safety through professional onsite repair and correct hose selection
- Increased operational efficiency with immediate, onsite support.

Hydraulic Breakdown?

Call 1800 HOSE VAN (1800 4673 82) for immediate onsite support, or find your nearest specialist online.

KRIMPOMATIC HOSE ASSEMBLY EQUIPMENT

Take control of your hose assembly in-house.

Motion's Krimpomatic hose assembly equipment range is built for performance where it counts.

The range includes powerful hydraulic crimpers, precision cut-off saws, and essential assembly equipment. Every Krimpomatic tool is designed to produce consistent, repeatable hose assemblies every time.

THE PROBLEM

Inconsistent crimp quality, supplier delays, and rework increase risk and cost; without reliable in-house capability, operations face avoidable downtime and safety concerns where precision and speed are critical.

THE SOLUTION

Motion's Krimpomatic hose assembly equipment range delivers a reliable, in-house solution for fast, precise hose assembly. Quality engineered, durable equipment enables your team to produce high quality, consistent assemblies on demand, reducing downtime, improving safety, and cutting reliance on external suppliers.

Features

- Heavy duty, industrial grade construction
- Precision hydraulic crimp systems with consistent, accuracy
- User-friendly controls, straightforward setup, and compact footprint options
- Integrated safety features and low-maintenance design

Benefits

- On-demand hose production
- Reduced downtime
- Consistent, accurate crimping
- Improved safety with guaranteed performance
- Greater operational control

Krimpomatic

In-house crimping that delivers precise, repeatable assemblies and faster turnarounds.

MOTION MOBILE WORKSHOP

Your workshop, where you work.

Motion Fluid Power Solutions Mobile Workshops provide a complete solution to eliminate downtime, reduce costly callouts and increase productivity.

THE PROBLEM

Off-site repairs and basic containers slow response times especially in remote environments. Every minute of downtime costs money.

THE SOLUTION

Motion's Mobile Workshops are more than containers; they are fully equipped onsite hose assembly facilities. Equipped with professional-grade crimping equipment and tailored inventory, they deliver immediate, self-sufficient support right where you operate, reducing downtime and keeping your business moving.

Features

- Fully equipped onsite hose assembly facility
- Organised storage & workstations
- Customised inventory to match your equipment
- Heavy duty, site ready construction

Benefits

- Reduced downtime
- Increased productivity
- Lower maintenance costs
- Greater operational control

**Remote Site?
Shutdown?
No Time to Wait?**

Motion's Mobile Workshops deliver onsite hose repairs, cutting downtime, delays, and costs.

MOTION HOSE HUB

In-house modular hose cell.

The Motion Hose Hub is an Australian-made, modular hose cell that unifies tools, storage, and workflow in a compact footprint, so workshops become self-sufficient without the scale or cost of a containerised solution.

THE PROBLEM

Workshops lose productivity when hose assembly isn't efficient or organised. External callouts, cluttered workspaces, and limited inventory control slow productivity and increase costs.

THE SOLUTION

The Motion Hose Hub is a compact, modular hose cell that brings organised, scalable hose assembly in-house, without the size and investment in a containerised workshop.

Motion Hose Hub

A compact, modular hose cell that streamlines workflow and scales with demand.

Features

- Height-adjustable cutter bench for safe, repeatable cutting
- Multi-reel holders to keep hoses organised and accessible
- Parts storage options
- Optional heavy-duty castors for mobility
- Turnkey solution for quick production readiness

Benefits

- Compact, unified hose assembly station
- Faster turnaround & reduced callouts
- Organised, ergonomic workflow
- Scalable as demand grows
