SmartWasher SW-33 Mobile Parts Washer - Starter Kit

Fits every application with its unique user-friendly design, large sink size, mobility and excellent features.

- Easy and efficient maintenance.
- User-friendly design.
- Compatible with SW-X1 OzzyJuice

$4,480

SW-33-4CRC

ROCOL

Food Safe Chain Lube 20L

Water resistant & non-toxic lubricant for the lubrication of chains and associated bearings in clean industry environments.

- Penetrates rapidly into pins and bushes
- Will not wash off
- during cleaning

$847

RY443934

Bakers Mate 20L

A dispersion of high grade graphite lubricant, containing wetting agents and synthetic polymer in a water base.

- Can be applied when the chain is still warm
- Operates at temperatures up to 600°C

$760

RY446320

FOODLUBE Grease 2 400g

Designed for the effective lubrication of all types of ball, roller and plain bearings operating under high loads in the food and other clean industries.

- Highly resistant to water wash off
- Excellent corrosion protection

$37

RY515330

Switch Plate Spray No.3 600g

A specially formulated dry film lubricant for use on railway switch plates.

- Safe to handle - no operator contact with product
- No need for cleaning solvents or brushes

$52

RY411299

FAST ORANGE

Fast Orange Hand Cleaner

Biodegradable, waterless hand cleaner that contains no harsh chemicals, petroleum solvents or ammonia that can sting cuts or abrasions.

- Fine pumice deep cleans the toughest dirt
- Pure fresh citrus scent

GATES PREDATOR V BELTS

The Proven Choice for the Toughest Applications

When equipment operates under extreme loads, high heat, contamination and shock conditions, standard belts can fall short. Gates Predator V Belts are engineered to outperform in the most demanding industrial environments while delivering measurable cost savings and improved drive efficiency.

From agriculture and forestry to mining, construction and manufacturing, Predator belt drives have proven themselves where performance matters most.

Reduce Drive Costs, Width and Weight

Predator V Belts are designed to transmit significantly more power per strand than standard V belts.

Compared to a conventional drive, Predator can deliver:

- Up to 35 percent reduction in total drive cost
- Up to 67 percent reduction in drive width
- Up to 50 percent reduction in drive weight
- 1.4 to 2.2 times more power capacity per belt

By transmitting more power with fewer belts, Predator enables more compact drive designs that reduce strain on shafts, bearings and other costly components.

Built for Harsh Environments

Predator belts are specifically engineered for applications involving:

- High power motors
- Sudden starts and stops
- Heavy shock loads
- Dirty or abrasive environments
- Exposure to oil and solvents
- Elevated ambient temperatures

They are REACH and RoHS 2 compliant.

Compact Drives That Save Space and Money

Because Predator belts transmit more power per strand, drive systems can be redesigned using fewer belts and narrower configurations. The result is a more compact and lighter drive that lowers material costs and simplifies maintenance while maintaining equal or greater power capacity.

For operations focused on uptime and total cost of ownership, this translates into long term savings, improved reliability and reduced downtime.

Powerbands®	BP*, CP*	SPBP, SPCP, 9JP*, 15JP*	3VP, 5VP, 8VP

NOTE: Predator® V-belts must be ordered in matched sets.
*Available on request

ENGINEERED FOR EXTREME PERFORMANCE

Stronger Than Steel Construction

Predator belts utilise aramid tensile cords that are pound for pound stronger than steel. This construction reduces belt stretch by up to 50 percent compared to standard V belts, improving load carrying capability and minimising the need for re tensioning.

Curved Sidewall Design

The patented curved sidewall design allows the belt to enter and exit the sheave groove smoothly. This reduces sidewall wear on both the belt and the sheave, extending overall drive life.

Multi Layer Tie Band in PowerBand Constructions

Predator PowerBand belts feature a multi layer tie band that joins individual belts together. This provides lateral rigidity, reduces vibration and minimises belt turnover in multi groove sheaves under heavy shock loads.

Reduced Friction and Heat Build Up

An abrasive and puncture resistant bare back or double fabric cover helps reduce friction and heat under shock loading conditions, improving durability in harsh environments.

Oil and Heat Resistant Compound

Predator belts are manufactured with an oil and heat resistant chloroprene compound body rated up to 82 degrees Celsius. They meet ARPM IP 3 2 oil and heat resistance standards and are built to withstand contamination from oil and solvents.

Operating temperature range is minus -35°C to +80°C.

Mobile Waste Oil Drainer

- Alemlube mobile waste oil drainer & extractor
- 70L reservoir tank capacity
- Collects waste oil from vehicle gear boxes or engines

$794

10070ALM

Commercial Mobile Waste Oil Drainer

- Alemlube low profile waste oil drainer
- Fully portable with a 100L tank capacity
- Suitable for industrial vehicles
- Large rubber wheels
- Internal baffles
- 86cm long handle
- 805mm W x 1098mm D x 240mm H

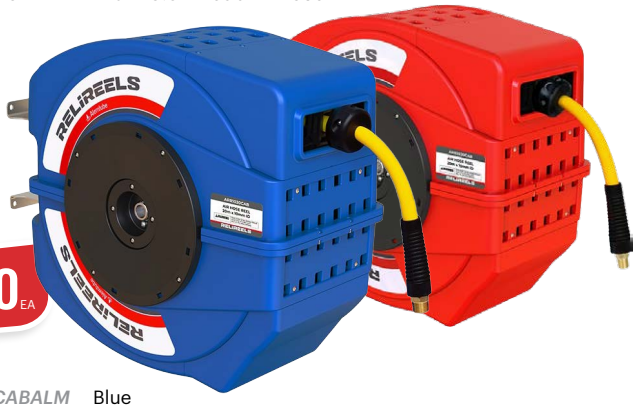

$795

42100ALM

ReliReels Compressed Air Hose Reel 20m x 10mm ID

- Industrial quality hose storage & retrieval system
- Gen3 hybrid polymer hose and hose bend restrictors to ensure a long service life for your hose assemblies
- 20m x 10mm ID with *0.9m lead in hose

$430 EA

ARR1020CABALM Blue
ARR1020CARALM Red

AAP Modular Workbench with Lockable Drawers

- Easy assembly
- Lockable drawers to secure tools
- Part of the AAP Alemlube Automotive Premium Modular Workshop Furniture & Storage Solutions range

$780

AAP202ALM

El Series 50:1 Ratio 20kg Grease Kit

- Ideal for use with all grease types up to NLGI2
- Engineered and manufactured using high quality materials ensuring a long and reliable working life
- Ideal for small to medium size workshops undertaking grease lubrication/greasing intermittently or seasonally

$1,057

G100120ALM

EL Series Heavy Duty Mobile Kit

- EL Series heavy duty mobile oil delivery kit with digital metered control valve
- Supplied with 3:1 ratio oil pump, heavy duty drum trolley, 1/2" ID hydraulic oil delivery hose, electronic metered control valve & bung adaptor
- Fully mobile oil delivery kit suitable for medium sized workshops

$2,054

O30060ALM

GULF WESTERN OIL
GO THE DISTANCE

Red Tacky Grease

A premium quality grease blended with a selected high viscosity mineral oil, lithium hydroxystearate soap thickener, special lead free EP additibe, rust and oxidation inhibitors and a shear tackiness agent. It is also dyed red for easy identification. Red Tacky Grease possesses superior lubrication characteristics. it is recommended for bearing lubrication under all operating conditions from normal to unusually severe load service conditions.

- Protects all moving parts from shock lading; it prevents scung and reduces wear with the excellent shear stability not found in conventional EP greases.

$12

40450GW

Super Blue Grease

A superior multi-purpose grease possessing in excellent lubricant characteristics for a wide range of anti-friction and plain bearings, gears and couplings in Automotive, marine, agricultural and industrial application. The extreme pressure and anti-wear properties enables the grease to give long service life under high loading and shock loading conditions from low temperature to ver high temperature environments. these special characteristics of shear stability, combined with the inclusion of effective rust, oxidation and corrosion inhibitors, and tackiness adhesive additives, ensure this grease is the preffered recommendation for sealed for life anti-friction bearings.

- Functional Multi-Purpose grease for LOW and HIGH temperatures. It provides lubricating protection even for intermittent operation up to 220 degrees.

$13

40451GW

Black Tak Molyplex Grease

Specifically developed to provide superior heavy duty industrial performance across a wide range of equipment. It is an extreme pressure, 5% molybdenum disulphide grease that provides excellent boundary protection from shock and wear under load. With an exceptional 800kg 4 ball weld load, Black Tak is able to keep protecting equipment in the harshest environments. It has excellent water washout resistance and provides extended lubricant intervals in the harsh conditions of mining, earthmoving and construction.

- Excellent resistance to water spray off and wash out.
- Excellent extreme pressure, boundary protection and anti-wear properties.

$16

40452GW

Truck and Farm Grease

A very high quality extreme duty application tacky complex soap grease. It is suited to nearly all heavy duty greasing application for agriculture, trucking, automotive, marine, industrial and earthmoving applications. It is formulated with a high base oil viscosity that offers excellent water washout and weld load properties. It is formulated from a combination of polybutene base stocks combined with lithium complex thickener, extreme pressure additives and effective rust, oxidiation and corrosion inhibitors.

- Truck & Farm Grease is the ideal recommendation for use in extreme heavy-duty applications and where water washout and high thermal resistance are needed.

$15

60454GW

Superdraulic ISO 68

A high performance anti wear hydraulic oil. It has been formulated using highly refined base oils fortified with zinc anti wear, oxidation corrosion inhibitors and anti foam additives. This produces ahighly thermally stable fluid capable of handling high loads and high temperatures.

- Improved equipment life and decreased downtime due to superior wear and corrosion protection.
- Excellent air release and antifoam properties to prevent caviation and oxidiation.

32063GW

Superdraulic ISO 46

A high performance anti wear hydraulic oil. It has been formulated using highly refined base oils fortified with zinc anti wear, oxidation corrosion inhibitors and anti foam additives. This produces ahighly thermally stable fluid capable of handling high loads and high temperatures.

- Improved equipment life and decreased downtime due to superior wear and corrosion protection.
- Excellent air release and antifoam properties to prevent caviation and oxidiation.

32062GW

Top Dog XDO 15W-40

A premium mineral oil based diesel engine oil meeting the latest in lubrication technology. It holds global approval from Mack Trucks, Renault, Volvo, Cummins and Detroit Diesel and is recognised as being suitable for initial factory fill or service fill lubricant. Top Dog can be used in stationery engines, heavy duty earth moving and road transport applications as well as light commercial diesel applications 4WD, SUV and utility vehicles and Allison C4 transmissions.

- Superior sludge and soot control for a cleaner engine.
- Suitable for turbo charged and naturally aspirated diesel engines.

32012GW

TiTAN LIFTING TECHNOLOGIES

Pipe Trolley 300kg

Compact construction , lightweight and easy to assemble. Capacity 300kg, suitable 60mm pipe beam diameter.

- Ideal for playgounds or factory environemnts
- Complies with AS1418.2

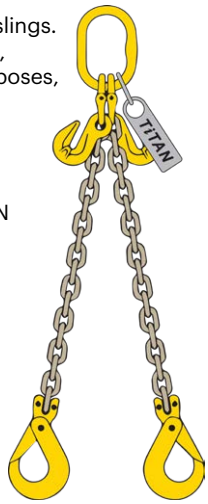

$179

TPT300TTN

G80 Chain Sling 8mm 2 Leg 2m with Grabs and Clevis Self Locking Hooks

High Quality G80 chain slings. Heavy Lifting Equipment, wide range of lifting purposes, available in other sizes, custom build availale upon request.

- Assembled, tested and Ccertified by TITAN
- Complies to AS3775

$429

TG8CS8-2L2M335

ChainType Drum Lifter 1

Compact and easy handling. Grip hooks tighten as you lift. Capacity 1000kg.

- Suitable for horizontal or vertial drum lifts
- Complies to AS4991

$119

TCDL-1TTN

Titan Magnet Lifter

Handle control for activation and deactivation, V groove feature for lifting round steel or pipes, proof tested 2 x WLL.

- Complies to AS4991
- Safety Handle to prevent accidental release

Alemlube Hand Operated Heavy Duty Drum Pump

- Suitable for the transfer of diesel, machine oil, lube oil, petrol & kerosene
- Suitable for transferring from 60L & 205L drums & bulk tanks
- Cast alloy body with delivery rates up to 18L/min.
- 2.2m of anti-static fuel hose
- 1300mm length with 2" bung adaptor can be reversed operated
- Includes bung adaptor, rubber gasket, four chamber rotor assembly, spout & spout holster

$170

501AALM

Devcon Plastic Steel Putty

Used in industrial maintenance to rebuild worn metal surfaces and restore damaged equipment components.

- Repairing damaged metal castings
- Rebuilding worn shafts and housings
- Filling voids or defects in cast components
- Restoring worn machinery surfaces
- General industrial equipment maintenance and repair

TIMKEN

Timken Timber Housed Units – SRB, TRB & Split CRB Solutions

Timken Timber Housed Units are engineered to perform in demanding sawmill and forestry environments. Designed to withstand heavy radial loads, shock loading, contamination and misalignment, these solutions are available in Spherical Roller Bearing (SRB), Tapered Roller Bearing (TRB), and Split Cylindrical Roller Bearing (CRB) configurations.

With rugged housing designs, advanced sealing systems and multiple shaft locking options, Timken housed units help maximise uptime, reduce maintenance frequency and improve reliability in harsh timber processing environments.

- Available in SRB, TRB, and Split CRB configurations
- Designed for heavy-duty timber applications
- Handles high radial loads and shock loading
- Options for combined radial and axial loads (TRB designs)
- Split-to-the-shaft designs available for easier installation and maintenance
- Accommodates shaft misalignment (SRB designs
- Robust sealing systems to protect against sawdust, debris, and moisture
- Heavy-duty housings for demanding mill environments
- Designed for relubrication and extended operating life

Spherical Roller Bearing Solid Block Housed Units

Cast steel housings with high-performance spherical roller bearings deliver outstanding durability in extreme conditions, including severe shock loads and vibration.

Spherical Roller Bearings

Known across industries for reliability, durability and performance, Timken® spherical roller bearings can help lower operating costs by reducing maintenance intervals and extending bearing life. In side-by side life testing under identical conditions, Timken bearings perform more consistently than our competitors' leading products.

- Longer lubricant and bearing life from cooler operating temperatures.
- Positive axial roller guidance and improved oil lubricant flow due to optimised internal geometries.

Tapered Roller Bearings

Not all bearings will face unforgiving conditions like huge payloads or high-contaminant environments. But when they do, Timken tapered roller bearings can handle the burden – with thousands of combinations in single-, double and four-row configurations to manage both radial and thrust loads.

Split Cylindrical Roller Bearings

Minimise drag. Reduce heat. And perform better, for longer, with less maintenance and downtime.

SUPPORT THE TEAM WIN THE MERCH

Motion is one of Australia's leading industrial distributors and service providers, and an official sponsor of Team Motion Racing in the 2026 Tyrepower V8 SuperUtes Series.

To celebrate the season, we're giving away three exclusive Team Motion Racing merchandise packs every month.

Follow Motion and Team Motion Racing on Instagram, Facebook, and LinkedIn for the latest team updates, race-weekend action, and behind-the-scenes content. Show your support, wear the Motion colours at the track, and enter for your chance to win.
