THE BEST RANGE OF STANDARD AND SOLUTION PRODUCTS AVAILABLE ANYWHERE

Behind every industry and application, Renold delivers reliable performance and increased productivity. From heavy-duty to light-duty operations, indoor or outdoor environments, and clean or contaminated conditions, Renold chains are engineered to perform in even the most demanding applications.

Whatever your operating environment or chain requirement, Renold and Motion have the right chain solution for you.

RENOLD A&S

- Premium performance
- Solid bush, solid roller, wedge rivet
- Wide waisted plate form
- A first class, all-purpose chain

RENOLD Synergy

- High performance
- Exceptional wear life
- Outstanding fatigue resistance
- **3 times wear life guarantee**

RENOLD Syno

- Self-lubricating chain
- Food industry approved lubricant
- Good resistance to corrosion
- Nickel-plating on plates won't chip or peel

RENOLD Hydro-Service

- Superior corrosion resistant coating will not chip or peel, hexavalent chrome-free
- Alternative choice to stainless steel chain

RENOLD Stainless Steel

- Designed for acidic/alkaline conditions
- Ideal for wet environments
- Food processing applications

RENOLD SD

- General Purpose Chain
- Split bush, solid roller
- Figure-8 waist plate

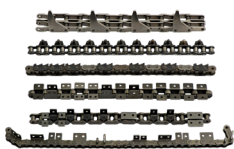

RENOLD Sovereign

- Resilient, durable components
- Reduced pin wear
- Suitable for high speed or heavy load applications
- Excellent reliability giving reduced maintenance costs

RENOLD Klik-Top

- Easy to install polymer blocks
- Suitable for use in hygiene sensitive areas
- Food industry approved
- Ideal for conveying easily damaged products such as glass, wood, packaging

RENOLD Adapted Transmission Chains

- Any type of attachment including specials
- Various types of base chains
- Large assembly facility with design engineers in Melbourne
- Fast response time

Roll-Ring

- Revolutionary chain tensioner
- Installed in seconds and self adjusting
- Acts as noise dampener

RENOLD Sprockets

- Wide range of standard and special sprockets
- Manufacturing plants and design engineers in Melbourne and Auckland
- Machined or profile cut and hardened for durability
- Split type and sprockets with removable tooth segments
