

TIMKEN SUPER AG-DRIVE® BELTS HELP KEEP AUSTRALIAN FARMS RUNNING STRONG

WHY CHOOSE TIMKEN SUPER AG-DRIVE® BELTS?

Timken Super Ag-Drive® belts are purpose-built for agricultural applications where heat, dust, shock loads and long operating hours can place pressure on critical machinery. With advanced EPDM material, aramid cord construction and reinforced multi-layer composition, they help reduce downtime and support reliable performance through demanding harvest periods.

ENGINEERED FOR AGRICULTURE

Advanced EPDM Material:

Resists oil, heat, hardening and glazing, with an operating range from -45°C to +120°C.

Aramid Cord Construction:

Provides high tensile strength and shock load stability for demanding agricultural drives.

Reinforced Multi-Layer Composition:

Helps prevent delamination and improves resistance to wear in harsh operating conditions.

BUILT FOR HARSH CONDITIONS

OEM Fit and Performance:

Designed to meet or exceed OEM specifications across a wide range of agricultural equipment.

Reliable Under Load:

Supports consistent power transmission across high-load, high-use harvest applications.

REDUCED DOWNTIME

Long-Term Durability:

Tested in lab and field conditions to support dependable performance over time.

Harvest Season Reliability:

Helps keep essential machinery running when uptime matters most.

APPLICATIONS

Harvesting Equipment:

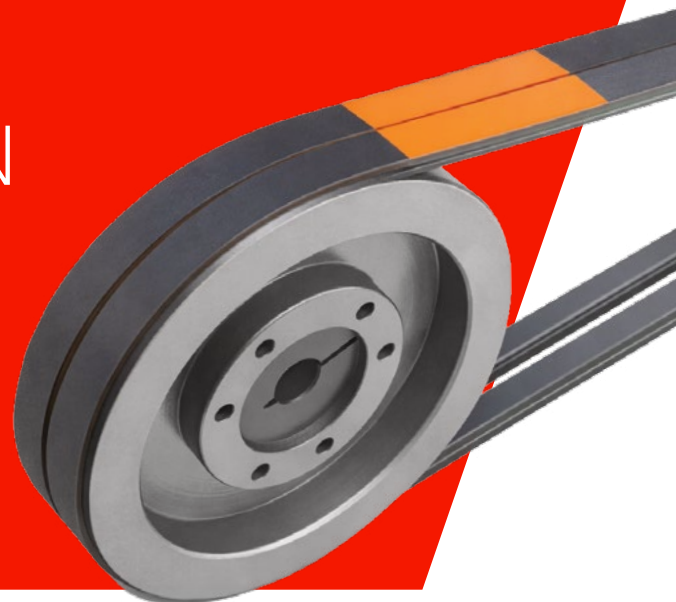

Combines, headers, slashers, pickers, mowers and other agricultural machinery.

Specific Drives:

Rotor drive, cylinder drive, feederhouse drive, straw-chopper drive, cleaning system drive, spreader drive, pump drive, shoe drive and more.

MOTION AND TIMKEN PARTNERING FOR SUCCESS

If your business wants to improve reliability and reduce costly disruption, Motion offers tailored solutions:

24/7 SUPPORT

Available support when critical production issues arise.

NATIONWIDE NETWORK

Local branches provide quick access to stock and expertise.

ON-SITE ENGINEERING

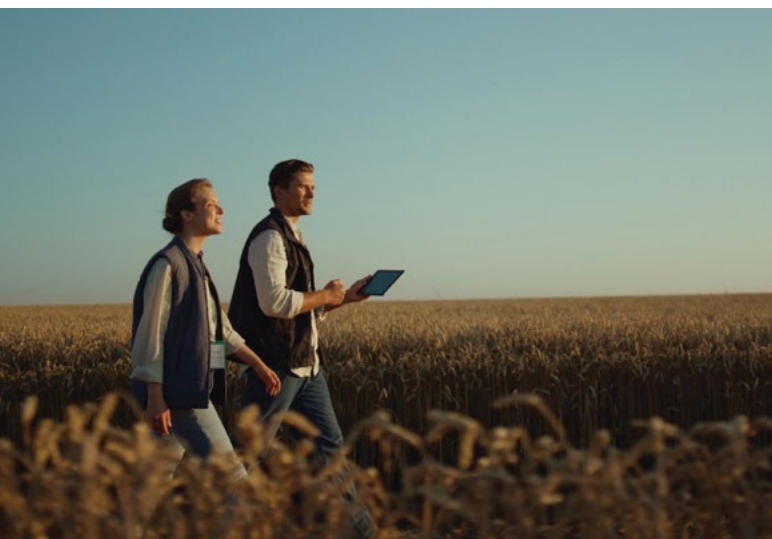

Expert support to keep operations running smoothly.

START STRONG THIS HARVEST SEASON

Plan ahead to reduce downtime. Inspect and replace worn agricultural belts with Timken Super Ag-Drive® belts to support reliable performance during demanding harvest periods.

Contact Motion today to learn how Timken Super Ag-Drive® belts can help keep your farm machinery running strong.
