

# INCREASE PERFORMANCE WITH RELIABLE ROLLER BEARINGS

At Motion, we understand the pressures of peak seasons. Hence, our partnership with **Timken®** ensures you can access the best in spherical roller bearing technology.

## ENGINEERED FOR EXTREME CONDITIONS:

### Misalignment Tolerance

Handles misalignments up to 1.5 degrees.

### Impact Resistance

Withstands impacts from debris without compromising lifespan.

## SUPERIOR STRENGTH AND DURABILITY:

### Cast Steel Housing

Provides enhanced durability compared to other units.

### Effective Sealing

Excellent primary sealing for added protection.

## Minimised Downtime

High quality bearings lower maintenance interruptions and costs.

## Enhanced Operational Efficiency

Unmatched performance and longevity to help operations run at peak efficiency.

## Long-Term Performance

No more need for frequent replacements and adjustments, saving you loss on parts and productivity.

## Why Partner with Motion?

Motion offers more than just products, key partnerships to optimise operations.

Our collaboration with Timken® ensures you receive top-tier bearings designed for your specific challenges.
